

Promotion Area

Main Task	Main KPI	2022 Results	Medium and long term goal
Strengthening the management of environmental pollutants	Percentage reduction in air pollutants from the baseline year (based on 2021 emissions of 15.645 tons)	9.175t	Minimize environmental impact by environment-friendly management Enhance monitoring through environmental management performance metrics Realize sustainable corporate value by reducing environmental footprint
GHR Reduction Goal Set-up and Achievement	Reduce greenhouse gas emissions with internal reductions	Target: 14,152(tCO2eq) Record: 30,750(tCO2eq) Achieved 217% of target	
Strengthening Waste Management	Business waste recycling costs	94%	
Strengthening the integration and monitoring of the environmental management performance of the workplace	Maintain ISO14001 certification	Renewal in 2022	

Types of Environmental Risks and How to Respond

Contents
<ul style="list-style-type: none"> • Risk of financial losses and damage to corporate image due to administrative sanctions for non-compliance with environmental laws and regulations, and loss of surplus credits due to GHG emissions trading system rollover restrictions. • Concerned about the risks of global companies' renewable energy requirements

Countermeasure

- Establish a company-wide environmental management system
- Establish environmental compliance, evaluation, and support systems
- Securing carryover capacity through the sale of surplus emission rights
- Review the use of renewable energy
